THE amount of Internal Revenue collections for the Covington district for Octoer was \$385,528.09.

THE betting at Washington Sunday on the result of the election in New York to-day was about even.

THE effects of the Cincinnati and South Eastern Railroad Company have been re-moved from Newport to Franklin, Pa.

Elections are being held in twelve states to-day. All interests however, is centered on the result in New York and

Hon. Samuel J. Randall can't see much difference between the platforms of the two parties in Pennsylvania, so far as the tariff question is concerned.

The result of the election is concerned.

The result of the election in New York to-day is awaited with interest in all parts of the country. The latest news from there predicts the success of the Democratic ticket.

FERD. WARD, who figured in the swindspeculations that led to the financial of Gen. Grant, has been sentenced to year's confinement in the State ten year's confine prison at Sing Sing.

HON. SANUEL J. RANDALL thinks that Congress will pass a law that will embody not only the spirit, but the letter of the platform of the Chicago Democratic Con-vention that nominated Cleveland.

The following are the Revenue collections made by Collector Robinson last month: Spirit tax, \$248,387.50; export, \$110; beer, \$350.50; tobacco, \$1,642.73; clgars, \$891.60; special tax, 406.90; lista, \$1,647.73; total, \$253,428.57.

When our esteemed contemporary, the Vanceburg Courier, sees the article in the Louisville Commercial about Colonel Z. T. Young, we suppose it will rise up, "strike an attitude" and cry "fair play," and "hands off" more frantically than

This doors of the White House are now closed to office-seekers for the first time in the history of the country. The order to this effect is a permanent one, and prihibits even Senators and members of Congress from broaching the subject of office in the President's company. The order was considered a public necessity, so great was the rush for office.

The Republican clerks in the various departments at Washington are, with few exceptions, remaining away from the election in New York. They are considering the interests of "number one," and say they don't care whether their party is successful or not. They have been treated very kindly by the present administration and don't intend to offend the President in any way if they can prethe President in any way if they can pre

vent it.

The Republican platform in Pennsylvania says the "tariff needs revision and the surplus abould be reduced." The Democrats in their platform demand a "reduction of the surplus and a revision of the tariff." The Democrats, however, add the proviso that this revision shall be done in a manner that will cause no harm to capital already invested and that wages shall not be reduced by reason of the cheap-bought labor of Europe.

The development of the natural gas

labor of Europe.

This development of the natural gos industry has been womierful. The existence of the article and its nee as a field and illuminant has been known for years at Pittaburg. Wells within piping distance of that place were offered tenyears ago for a mere trifle when compared with their value to-law, but found no buyers. Its value in the manufacture of iron and other articles was not then known, and these wells kept steadily flowing for years, wasting millions of feet of the finest fuel ever discovered. About nine years got this article was first used in the manufacturing industries of that place, and a decided improvement was noticed in the quality of their product. Its use, however, was not very extensive until about eighteen months ago, when the "boom" came. At the present time there are \$7,000,000 invested by companies engaged in supplying it to the citizens and manufactories of that place. About six hundred unlies of pipe has been laid and wood and coal has been almost driven out of tese. The product of fifty wells is now utilized.
